SUMMARY

Full-stack developer proficient in Next.js, TypeScript, and React, specializing in building scalable web applications and secure data management solutions. Experienced in multi-component integration, cross-regional system adaptation, ML deployment, and UX/UI design. Demonstrated ability to master new technologies quickly and deliver high-quality solutions in fast-paced environments.

SKILLS

Language: JavaScript, TypeScript, Python

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, Bootstrap, MUI, ShadCN, Figma

Backend: Node.js, Express, Prisma, Flask, PostgreSQL, MySQL, MongoDB, SQLite, SageMaker

Tools & Testing: Tools & Testing: Jest, unittest, DOM, jQuery, Docker

EXPERIENCES

Spanish National Research Council

Sep 2024 - Present

Full Stack developer

Remote

- Integrated multilingual codebase between Spanish and UK platforms using Next.js, TypeScript, and React.
- Enhanced Python-based CV generator with multiple language support.
- Implemented secure data management systems using Prisma and Docker for multi-region development databases.
- Optimized randomization algorithms for regional applicant information requirements.
- Developed custom data export formats and visualization solutions for research teams.
- Resolved data consistency issues across multiple regional configurations.
- Integrated critical infrastructure services including Mailgun for system communications.
- Analyzed job crawler codebase and identified optimization opportunities for research requirements.

Stealth Startup

Apr 2024 – Nov 2024

Full Stack Developer (UX/UI Focus)

Remote

- Designed and led end-to-end UX/UI processes, creating wireframes and final designs using Figma and Figjam.
- Built proof-of-concept web applications using Next.js, TypeScript, and React with real-time data processing.
- Implemented responsive UI components using the ShadCN library and maintained cross-platform compatibility.
- Collaborated on LLM model evaluation and created comprehensive deployment documentation.
- Supported ML model deployment on AWS SageMaker and endpoint testing.

Code First Girls Degree Program

May 2023 – Sep 2023

Software Engineering Stream

Remote

- Achieved Distinction (97% grade) in an intensive 16-week software development program.
- Independently implemented OpenAI API integration with PyGame to enhance game content variety.
- Optimized application performance by implementing Threading library for login systems and API calls.
- Collaborated on group project using Jira for documentation and development tracking.
- Developed full-stack applications using Python, Flask, and MySQL following OOP principles.
- Project: [Stray Whiskers](#).

Northcoders

Mar 2023 – Jun 2023

Software Development Student

Remote

- Built and deployed RESTful APIs with PostgreSQL database for search, post, update, and delete operations.
- Implemented comprehensive QA automation suite with 56 Jest test cases for feature validation.
- Engineered 5 reusable UI components using React and Material UI for enhanced user experience.
- Developed secure user authentication system using bcrypt for password hashing and database storage.
- Created interactive navigation system with conditional rendering based on React state management.
- Designed and implemented validation forms and tappable rating system for improved user interaction.
- Optimized error handling and database seeding processes in PostgreSQL environment.
- Collaborated on full-stack e-learning platform development following industry best practices.
- Projects: [Karlie Games \(Backend\)](#), [Karlie Games \(Frontend\)](#).

EDUCATION

Jinan University, BBA - Business Administration and Management
